

Lecturer:

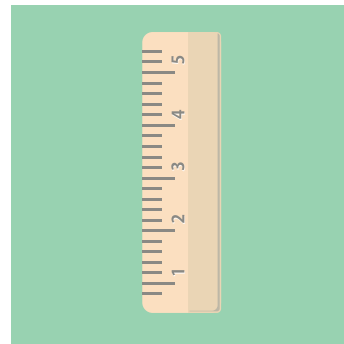

Dr. Linda von Hoene
Dir. Sabrina Soracco

(University of California,
Berkeley)

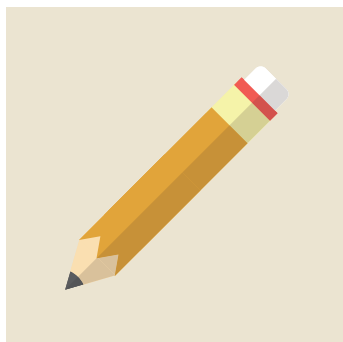

workshop on creating rubrics

In our university, we are going under the Super Global Universities program, and the 11-step GPA (Grade Point Average) grading scale is introduced. Faced with the widespread use of GPA grading system, students are highly interested in their performance evaluation. A reliability, objectivity and transparency in the students' performance evaluation has been strongly demanded on teachers. One of the ways for an effective students' performance evaluation is a rubric evaluation method, which has attracted attention in recent years. The workshop includes the introductory lecture and training on how to design and use rubrics.
